## SUMMARY

---

I am a full-stack developer with experience in developing scalable applications using Full stack . I am committed to developing technology solutions that meet business needs.

## SKILLS SUMMARY

---

- **Front-End Technologies:** Created user interfaces with HTML5, CSS3, JavaScript, frameworks like React.
- **Back-End Development:** Skilled in java,python for problem-solving.
- **Database Management:** Familiar with MySQL for querying relational Databases.
- **Version Control:** Strong command of Github for collaborative development and version management.
- **Additional Tools:** npm, Visual Studio Code, Eclipse, MS Office.
- **Analytical Skills:** Critical Thinking, Problem Solving, Debugging, Attention to Detail, and Algorithmic Thinking.

## INTERNSHIPS AND PROJECTS

---

- **Frontend Devoleper - CodeXIntern** AUG 2024 - OCT 2024  
During my Internship, I worked on multiple projects using React js . The first project was Youtube Clone Application that allowed users to search for various Information includes Gaming,blogs,Events. The second project was a Tourism website Application where users could Know About places, hotels near to them,activities. Both projects featured real-time notifications and seamless user authentication.
- **E-Commerce App Using MERN Stack -shopper** May 2024 - July 2024  
Spearheaded the development of a high-performance E-Commerce app using React JS, successfully deployed in a real-time business environment, serving thousands of users and processing numerous orders daily, leveraging reusable components, optimized state management, and robust code organization to ensure seamless user experience, real-time order tracking, and maximum reliability, resulting in significant sales growth, customer retention, and market competitiveness for the business.  
**Key Skills Gained:**React JS, State management,Database management.
- **College Website Using ReactJS** Sep 2024 - Oct 2024  
Built and deployed a responsive college website using React.js. Integrated smooth scrolling, a dynamic slider, and a contact form with email functionality for handling inquiries. Demonstrated skills in React component architecture, responsive design, and form handling..

## EDUCATION

---

- **Mahatma Gandhi Institute of Technology** Hyderabad, India  
*B.Tech - Electronics and Communication Engineering; CGPA:7.42* *November 2020 - June 2024*
- **Sri Chaitanya Junior College** Hyderabad, India  
*Intermediate-MPC; PER:96.3* *July 2018 - June 2020*

## CERTIFICATIONS

---

- Programming using Java by Infosys.
- Data Analysis from IBM.
- Introduction to No SQL databases.
- Data Structures and Algorithms using Java.
- Software engineering and Agile Software Developer.

## ACHIEVEMENTS

---

- Top performer on Latest Coding Techniques of Satellite Communication at **NRSC**
